# Hectronic legacy products

Over the past two decades Hectronic has designed and manufactured numerous COM modules, computer boards and systems.

LOOKING FOR SOMETHING NEW?

Hectronic products are built to last and some of them are still in use. If you have a legacy product in use but need a new product, Call us.

We will be happy to suggest a new product to meet both your requirements for increased performance as well as operation with existing systems.

SECURING PRODUCT LONGEVITY

Over processor generations

The lifetime of an embedded processor is typically seven years. End-of-life requires a generation shift of the embedded computer. Increased processor performance and new functionality in the end product is promising for competitiveness when making the shift.

Legacy challenges in embedded computing

Today's processor platforms offer new possibilities based on functionality, high-speed interfaces, increased performance and low power operation. In one way it's a freedom of choice. However, the facts of life aren't always about freedom of choice.
